## Does Philosophy exist in the singular?

Reflection centers on the fallacious nature of "Philosophy" as a unitary whole—an idea produced and imposed by Europe through its colonizing processes—which resulted in the erasure of the non-Western philosophies of the Indigenous peoples of Asia, Africa, and America (Abya Yala).

## Updating professions linked to Philosophies

This is not merely about keeping pace with new technological or market transformations, but rather about opening up the debate on the ontological, gnoseological, and epistemological foundations of these new realities, where the destiny of humanity and the Biosphere is decided.

## Philosophies from, with, and for life

Martim pondered, in a very poetic manner, where life begins and from which workshop we humans (complicated and wonderful) emerge, and answered that life is a slow aggregation and an admirable chain linking all forms of existence.

## We all do philosophy

Philosophizing, as a human condition, should contribute to expanding and reclaiming the meaning of Philosophies, transcending both imposed reductionism and academic confines, serving as both a vital necessity and a comprehension of the minute fragment we constitute.

## Philosophers as part of AI development teams

To defend life and the rights of human (and non-human) species. The bioethical responsibility of technology also involves philosophies from, with, and for Life.
